

STANDARD BREED
CANADA

Looking for **REAL HORSEPOWER**

WE'RE HIRING

POSITION: Intermediate Java/PHP Developer

Get to Know Us:

Standardbred Canada is a not-for-profit association and the national breed registry for the standardbred horse with over 6000 members. We serve our horses and members by recording pedigrees and racing statistics for the Canadian harness racing industry and by being a news leader for the industry with a very active website and monthly Trot magazine.

Culture

"It's about the H.O.R.S.E. of course" – At Standardbred Canada our corporate values promote Honesty, Ownership, Respect, Service to Others and Excellence. Our success is powered by people and technology. We champion diversity and always look for ways to put more pace into the sport. Our employees are the real horsepower of the association and are always at the core of who we are and what we do.

Location: 2150 Meadowvale Blvd, Mississauga, Ontario

Summary of Position: • **Intermediate Java/PHP Developer**

Standardbred Canada is an incorporated non-profit organization whose mandate is to supervise, record, store and distribute information on all registered Standardbreds and to promote harness racing in Canada and beyond

We are currently seeking an enthusiastic and experienced Intermediate Java/PHP Developer to assist with the development and enhancements of the Association's current software. This is a permanent position, reporting to The Manager, Information Technology and based at our head office in Mississauga.

Responsibilities:

- Work with a team to design, develop and maintain web applications using Java technologies. Will involve, but not limited to designing and developing site architecture, custom components, custom workflows, implementation strategy, performance testing and unit testing. Development work will be a major part of this position.
- Ability to analyze business requirements and translate them into developer requirements, strong experience on Java and J2EE based technical specs web development.
- Experienced in full Software Development Life Cycle implementation of web systems
- Ability to partner with business users and stakeholders, delivering sustainable solutions and exceeding their expectations.
- Ability to identify and troubleshoot problems and issue and apply sustainable solutions
- Team player – needs to work collaboratively with colleagues, partners and customers
- Good understanding of database design

Education:

- University degree in computer science or information systems preferred, or an acceptable combination of education and experience

Required Skills:

- 4+ years of experience on core Java, J2EE, Maven and JUnit and Web Application Servers like Tomcat
- Minimum 4 years of JavaScript Programming
- Minimum 4 years of Web Technologies like Angular JS, HTML5, CSS and Restful Web Services
- Minimum 4 years of working with SQL and Relational Database
- Minimum 4 years of Unix / Linux or similar
- Experience using object-oriented programming languages and concepts (4+ years)
- Ability to communicate, educate and work well with others
- Independence, willingness to learn and problem solving skills
- Solid experience writing AngularJS 1.5 and UI Bootstrap
- Apply knowledge of technologies, applications, methodologies, processes and tools to support a project such as Eclipse/Maven/SVN on Windows OS

Additional Assets:

- Enthusiasm for and knowledge of Linux, Apache, W3C technologies including HTTP and XML
- Exposure to Agile approaches to software development
- Hands-on experience with relational databases
- Knowledge of Drupal, PHP, JQuery, Ajax
- Bootstrap
- Dev Tools like SVN, Jira

The salary level for this position remains flexible, commensurate with the experience level of the successful candidate.
